

# THE UPDATE

ISSUE 7 • DECEMBER 2020

## So long, 2020!

Dear customers, partners & interested clients,

We hope this newsletter finds you well and healthy. As 2020 has been a whirlwind of a year for all of us, we are very much looking forward to what next year brings. Currently, we are finishing up lots of important projects as Q4 closes and, of course, have some important and interesting news to share with you all. We hope you enjoy reading this edition of *The Update*.

All our best,

The Dosimetrics Team

NEW! 2E Dosimeter Holder • P. 2

Featured Customer • P. 3

BeOSL Ring Development • P. 3

Season's Greetings • P. 4

# DECEMBER 1ST WAS AN IMPORTANT DAY FOR US...

...On this day, Dosimetrics became a part of the Mirion family!

This was not an easy decision to make, but, in the end, Gerd and Reiner decided on the best interest of our products, their long-term development, our customers and our employees. In the last years, the dosimetry landscape has changed significantly.

In light of these recent changes, Dosimetrics needs a strong global partner in order to continue on its successful path and provide you with the best possible products and services.

Now part of Mirion's Dosimetry Services Division (DSD), we will continue to operate as we have. There will be no changes in operations, staffing, contracts and relationships. Most important: Gerd and Reiner remain Managing Directors. We have been working with DSD since 2014 and always in a very trustful way. We have made friendships and this does not only apply to Gerd and Reiner. We have been assured by the Division President, Lou Biacchi, to get all the support from DSD we will need.

## LATEST COVID-19 UPDATE

We are continuing to take precautions as COVID-19 cases rise in Germany. As the rules and regulations continue to change weekly, we are adjusting our safety measures while keeping our office open and completing orders. Our "new normal" consists of a mix of working from both home and the office; we are committed to keeping ourselves safe while also providing the best support possible to our customers. As always, we encourage you to reach us via:

- **support@dosimetrics.de**: for IT Support and Customer Service.
- **sales@dosimetrics.de**: for product information, quotes, orders, etc.

## NEW! BEOSL TWO-ELEMENT HOLDER WITH BUILT-IN STRAP CLIP

There is a brand new, BeOSL Two-Element Holder now available. This plastic holder comes in two pieces: a front and back. The user can close the holder shut with their own hands and it opens easily with an opening tool. It securely fits the BeOSL Two-Element Dosimeter and has a built-in strap clip for secure wearing.

One of the best features is that this holder is reusable, allowing the user to save money on repurchasing holders that are one-time use. This ecofriendly holder was manufactured and designed from our partners at **Sievert** in Colombia.

Want to know more? Send our Sales team an email **sales@dosimetrics.de** to receive a quote and more information.

# FEATURED CUSTOMER: CHRISTIAN HEALTH ASSOCIATION OF KENYA (CHAK)

In this issue of *The Update*, we are featuring our new customer from Africa, Christian Health Association of Kenya (CHAK). Joseph Rugut, the Electrical and X-Ray Engineer at CHAK was delighted to share information about his organization with us.

## What is the history of CHAK?

CHAK is a leading national Faith Based Organization (FBO) of Protestant churches' health facilities and programs located throughout Kenya. CHAK was first established in 1946 with a primary focus on providing and promoting quality health care access across the nation. The organization is comprised of various health facilities and member programs, governance organs including a regional structure and the Secretariat situated in Nairobi.

*This is picture of Joseph and Reiner was taken at the IAEA in Vienna, Austria in 2016.*

## What does Joseph Rugut's part of the organization do?

Joseph and his team's division of CHAK focuses on Radiation Safety. They source, install and maintain radiology-related equipment in FBO, non-profits and some public facilities in Kenya. They facilitate calibration and certifications for these different entities. Their team also administers quality assurance and control protocols and Radiation Safety Assessment (RSA) to meet local and international standards. Lastly, they provide trainings for their colleagues and members of CHAK throughout the various locations in Kenya.

## How did CHAK first learn about Dosimetrics and the BeOSL System?

CHAK first learned about Dosimetrics at an IAEA conference in Vienna in 2016. Reiner introduced Joseph and his team to the BeOSL System and since then they have always had an interest in having one of their own. Finally, at the beginning of this year, Joseph and his team received their BeOSL System through a cooperation with a German-based organization.

To learn more about CHAK, visit their website: <http://www.chak.or.ke/>

## NO-ID BEOSL FINGER RING DEVELOPMENT

We have heard your feedback and know that providing a small label for the new BeOSL Finger Ring (without an ID number) is very important for many of you. We are in the development phase of creating a very minimally-sized label that will pair with the new ID-less finger ring. We would like to hear your feedback about what features would be best for this type of label.

Please take our quick 30-second **survey** to let us know your opinion.

Feel free to also send us your feedback via email: [sales@dosimetrics.de](mailto:sales@dosimetrics.de).

# Season's Greetings & Happy New Year!

We send you, your family and team a safe and warm Season's Greetings. We wish you well into the New Year too! We are looking forward to meeting you next year when (hopefully) our User Group Meeting can take place once again.
